Hiring Manager
Boston Consulting Group

Dear Hiring Manager,

I am writing to express my interest in the Associate position at Boston Consulting Group. With a solid background in physics, machine learning, data science, and analytics, I am excited about the chance to contribute to Boston Consulting Group's mission of creating lasting, positive change.

Throughout my career, I have developed and improved my analytical and problem-solving skills. What really excites me, though, is strategic thinking. I often find myself looking beyond the technical aspects of my work to consider how best practices can improve a company's overall situation. This mindset extends to my personal life as well; for example, as a football coach, I constantly looked for ways to improve marketing strategies and training processes.

Even with my technical background, I've always been drawn to the strategic side of business problems. The Associate role at Boston Consulting Group seems like a perfect fit, allowing me to combine my technical expertise with strategic thinking. I am particularly eager to work with diverse teams and experts at Boston Consulting Group to tackle the significant challenges clients face in various sectors.

Boston Consulting Group's commitment to strengths-based development and coaching aligns with my career goals. I am excited about the opportunity to help clients achieve their most important goals. Developing my leadership style and building trust-based relationships with clients are aspects of the role that I find especially appealing.

I believe my technical skills, combined with my strategic thinking and passion for problem-solving, make me a strong candidate for this position. I look forward to the opportunity to discuss how my experience and skills can contribute to your team.

Thank you for considering my application. I am enthusiastic about the possibility of contributing to Boston Consulting Group's success.

Sincerely,

Nicolo' Pedrani
